1. Introduction

The purpose of this document is to explain the requirements for *A Paw For You*. This is a web application that allows individuals to adopt pets. Section 1 contains a short introduction to the software. Section 2 gives an insight into systems that have already been implemented similar to ours. Section 3 provides a proposed system that expands beyond the limits of current software by providing an overview of the software, along with its functional requirements, nonfunctional requirements and constraints.

2. Current System

There are many pet adoption systems in the Internet where users can browse all available pets, adopt pets and see the information where the pet is available for pickup once it has been adopted. The problem occurs when individuals adopt pets that they are unfit to care for. This results in lots of clients returning the pet, or worse, abandonment. Another problem occurs when administrators have a separate system, usually not synced with the website, to input and remove pets from the system. This in turn results in a discordance between the actual pet's database and available pets on their online system, creating conflict between guests and administrators.

3. Proposed System

3.1. Overview

This project, *A Paw For You*, will be a web application that allows approved individuals to adopt the perfect pet. It will allow clients to adopt them directly from the website once they have been pre-approved by the system. Administrators will be able to input new pets into the system, and remove or modify existing pets. The system will approve or disapprove the applications of the possible clients. The system will also give recommendations to clients about how many pets/which pets they should adopt depending on their application. Guests can browse the available pets if they are interested in adopting a pet but, must submit an approved application in order to become a client and adopt a pet.

3.2. Functional Requirements

The system should meet the following functional requirements:

- All users should be able to browse the available pets that are up for adoption and read the corresponding information about each pet.
- Guests should be able to submit an application if they wish to sign up and adopt a pet.
- Clients should be able to modify their profile if their personal information changes.
- Administrators should be able to add and remove pets from the system.
- Clients and administrators should be able to adopt pets.
- Clients and administrators should be able to view their user profile.
- Administrators should be able to add new administrators.

3.3. Nonfunctional Requirements

The system should meet the following nonfunctional requirements:

- Easy to use for nontechnical users.
- Remain running 24 hours a day.
- Information must be securely stored and backed up daily.
- All added or removed pets by the administrators must be available immediately.
- Once a pet has been adopted, the pet shall be displayed as pending immediately.
- Multiple users can use and make changes to the system concurrently.

3.4. Constraints

The system should meet the following nonfunctional requirements:

- Delivered by April 17th, 2017.
- Scalable to support multiple users simultaneously.
- Supported by different browsers.

3.5. System Models

3.5.1. Use Case Model

3.5.1.1. Sign Up

Participating Actor: Guest

Entry Condition:

- The guest is on the *Home* page in the system.

Flow of Events:

- The guest clicks on the *Sign Up* button.
 - o The system displays the Adoption Application Form.
- The guest enters their corresponding information in all the fields provided.
- The guest clicks on the *Submit* button. [Invalid or missing information]
 - o The system notifies the actor whether their application has been approved.
 - o The system adds their information to the database.

Exit Condition:

- The guest gets notified that their application has been approved
and
- The system has added their information to the database.
or
- The guest gets notified that their application has been denied.

Exceptions:

- [Cancel signup] The system disables editing, discards changes, and brings the user to the *Home* page at any point in the process.
- [Invalid or missing information] A notification is displayed and the invalid fields are indicated by a mark. The system remains in the editing state.

3.5.1.2. Login

Participating Actor: Guest

Entry Condition:

- The guest is on the *Home* page in the system.

Flow of Events:

- The guest clicks on the *Login* button in the navigation bar.
 - o The system displays the *Login* page.
- The guest enters their corresponding email and password.
- The guest clicks on the *Submit* button. [Invalid email] [Invalid credentials]
 - o The system takes them to the *Adopt* page where they now have the option to adopt the pets and not just browse.

Exit Condition:

- The guest is taken to the *Adopt* page **and**
- The guest is identified as a client or an administrator.

Exceptions:

- [Invalid email] A notification is displayed indicating that the email they input was not registered, and remains in the editing state.
- [Invalid credentials] A notification is displayed indicating that their password was incorrect, and remains in the editing state.

3.5.1.3. Logout

Participating Actor: Client, Administrator

Entry Condition:

- The actor is on any page in the system.

Flow of Events:

- The actor clicks on the *Logout* button in the navigation bar.
 - o The system takes them to the *Home* page.

Exit Condition:

- The actor is taken to the *Home* page **and**
- The actor is identified as a guest.

3.5.1.4. Adopt A Pet

Participating Actor: Client, Administrator

Entry Condition:

- The actor is on the *Adopt* page in the system.

Flow of Events:

- The system shows the images and descriptions of all the available pets along with a button called *Adopt Pet* beneath each pet.
 - o The actor clicks on the button under the corresponding pet they wish to adopt. [Pets Adopted Limit]
- The system shows a confirmation page with instructions on how to proceed with pet pickup.
- The system marks the pet with *Adoption Pending* on the *Adopt* page removing the possibility for other users to adopt that pet.

Exit Condition:

- The actor has been given a confirmation page and instructions on how to proceed with the pet pickup **and**
- The system marks the pet as *Adoption Pending* removing the possibility for other users to adopt that pet.

Exceptions:

- [Pets Adopted Limit] A notification is displayed indicating that they already have the maximum amount of pets based on their living conditions. The system discards changes, and brings the actor to the *Home* page.

3.5.1.5. Browse Pets

Participating Actor: All Users

Entry Condition:

- The actor is on the *Adopt* page in the system.

Flow of Events:

- The actor clicks on the *Adopt* button on the navigation bar.
 - o The system shows the images and descriptions of all the possible pets available for adoption.

Exit Condition:

- System shows the information requested.

3.5.1.6. Add A New Pet

Participating Actor: Administrator

Entry Condition:

- The administrator is on the *Adopt* page in the system.

Flow of Events:

- The administrator clicks on the *Add New Pet* button.
 - o The system displays the Add New Pet Form with all the fields necessary about the new pet.
- The administrator enters all the corresponding information about the new pet in all the fields provided.
- The administrator clicks on the *Submit* button. [Invalid or missing information]
 - o The system adds the new pet to the system.

Exit Condition:

- The administrator has been given a confirmation page saying that the pet has been successfully added **and**
- The system adds the new pet to the system.

Exceptions:

- [Cancel add new pet] The system disables editing, discards changes, and brings the user to the *Home* page at any point in the process.
- [Invalid or missing information] A notification is displayed and the invalid fields are indicated by a mark. The system remains in the editing state.

Quality Requirements:

- All added pets by the administrators will be available immediately.

3.5.1.7. Remove Pet

Participating Actor: Administrator

Entry Condition:

- The administrator is viewing the *Adopt* page in the system.

Flow of Events:

- The administrator clicks on the *Remove Pet* button under the pet of their choice.
 - o The system removes the pet from the system.

Exit Condition:

- The administrator has been given a confirmation page saying that the pet has been successfully removed **and**
- The system removes the pet from the system.

Quality Requirements:

- All removed pets by the administrators will no longer be available effective immediately.

3.5.1.8. View User Profile

Participating Actor: Client, Administrator

Entry Condition:

- The actor clicks on the *Your Account* button on the top right of the navigation bar.

Flow of Events:

- The actor clicks on the *Your Account* button on the top right of the navigation bar.
 - o The system shows the user their account consisting of the information they input when they filled out their application.

Exit Condition:

- System shows the information requested.

3.5.1.9. View Frequently Asked Questions

Participating Actor: All Users

Entry Condition:

- The actor clicks on the *FAQ* button on the top right of the navigation bar.

Flow of Events:

- The actor clicks on the *FAQ* button on the navigation bar.
 - o The system shows the *Frequently Asked Questions* page with questions and answers pet owners commonly have.

Exit Condition:

- System shows the page information requested.

3.5.1.10. Modify Profile

Participating Actor: Client, Administrator

Entry Condition:

- The actor is on the *Your Account* page in the system.

Flow of Events:

- The actor clicks on the *Modify Profile* button.
 - o The system displays the fields that can be modified (name, email and password)
- The actor modifies the information they wish to change.
- The actor clicks on the *Submit* button. [Invalid or missing information]
 - o The system updates only the fields the actor changed and the changes are reflected on the *Your Account* page.

Exit Condition:

- The actor has been given a confirmation page saying their profile information has been successfully updated **and**
- The system saves their new modified information in the system.

Exceptions:

- [Cancel signup] The system disables editing, discards changes, and brings the user to the *Home* page at any point in the process.
- [Invalid or missing information] A notification is displayed and the invalid fields are indicated by a mark. The system remains in the editing state.

3.5.1.11. Add New Administrator

Participating Actor: Administrator

Entry Condition:

- The administrator is on the *Your Account* page in the system.

Flow of Events:

- The administrator clicks on the *Add New Administrator* button.
 - o The system displays the Add New Administrator Form with all the fields necessary about the new administrator.
- The administrator enters all the corresponding information about the new administrator in all the fields provided.
- The administrator clicks on the *Submit* button. [Invalid or missing information]
 - o The system adds the new administrator to the system.

Exit Condition:

- The administrator has been given a confirmation page saying that the administrator has been successfully added **and**
- The system adds the new administrator to the system.

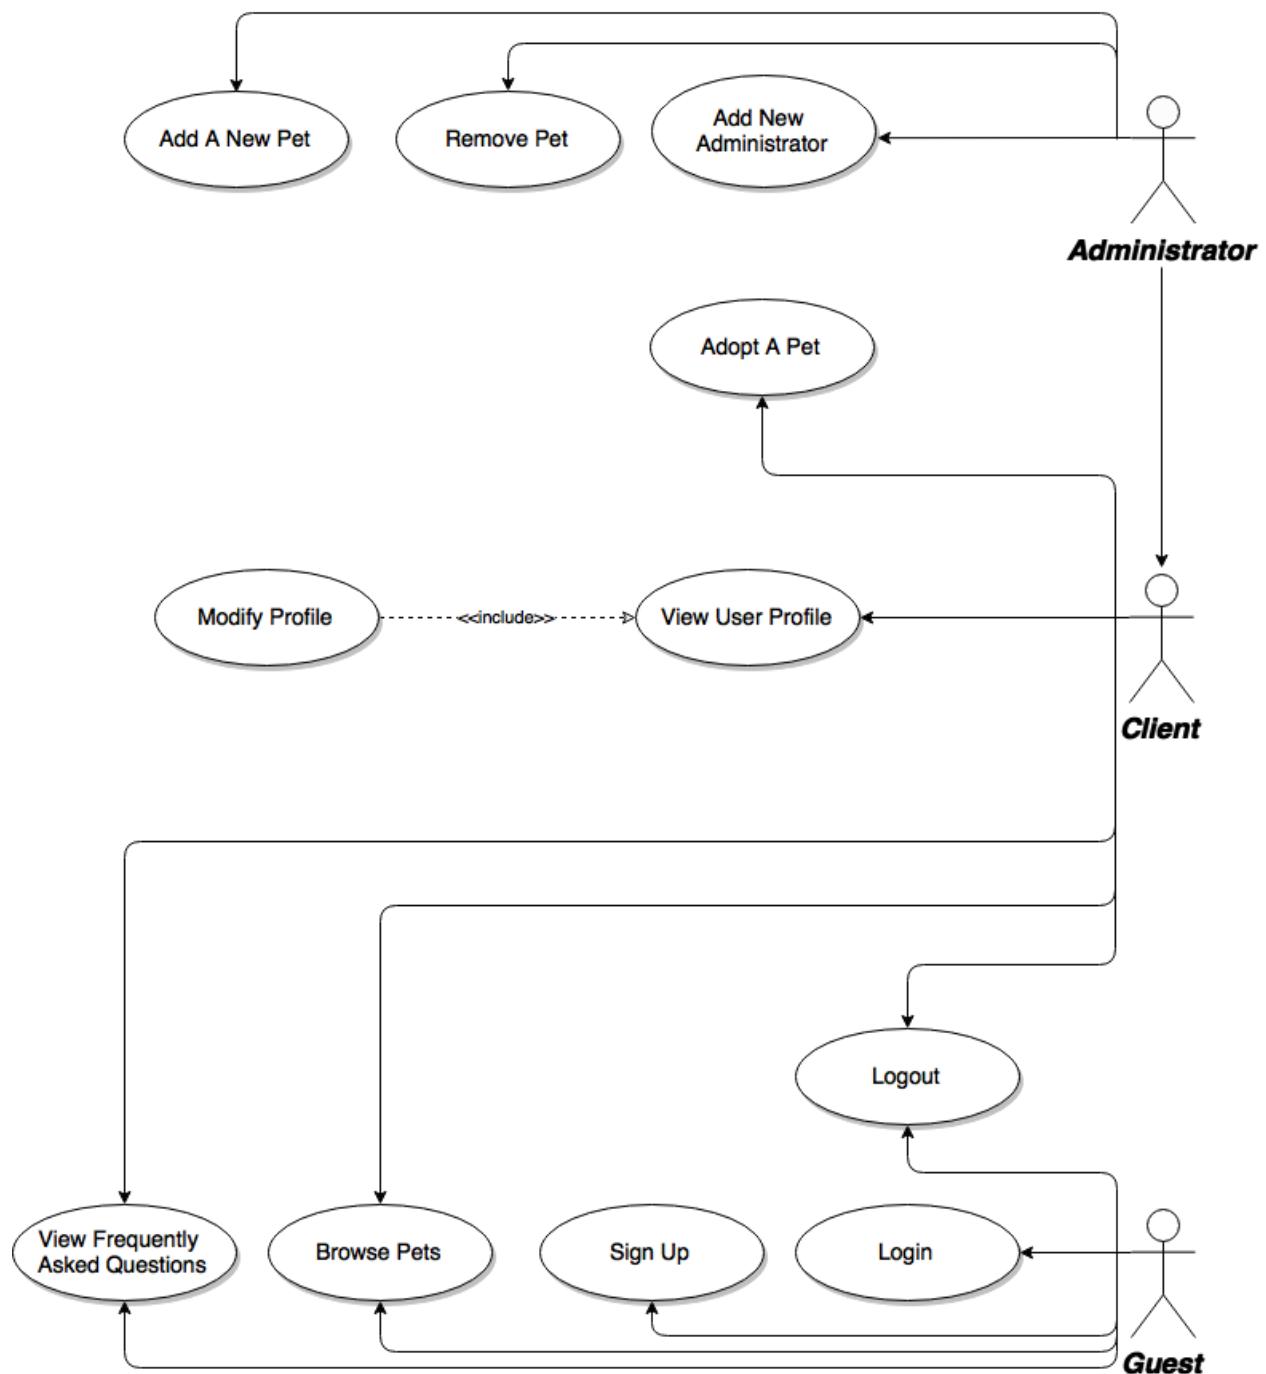

Exceptions:

- [Cancel add new pet] The system disables editing, discards changes, and brings the user to the *Home* page at any point in the process.
- [Invalid or missing information] A notification is displayed and the invalid fields are indicated by a mark. The system remains in the editing state.

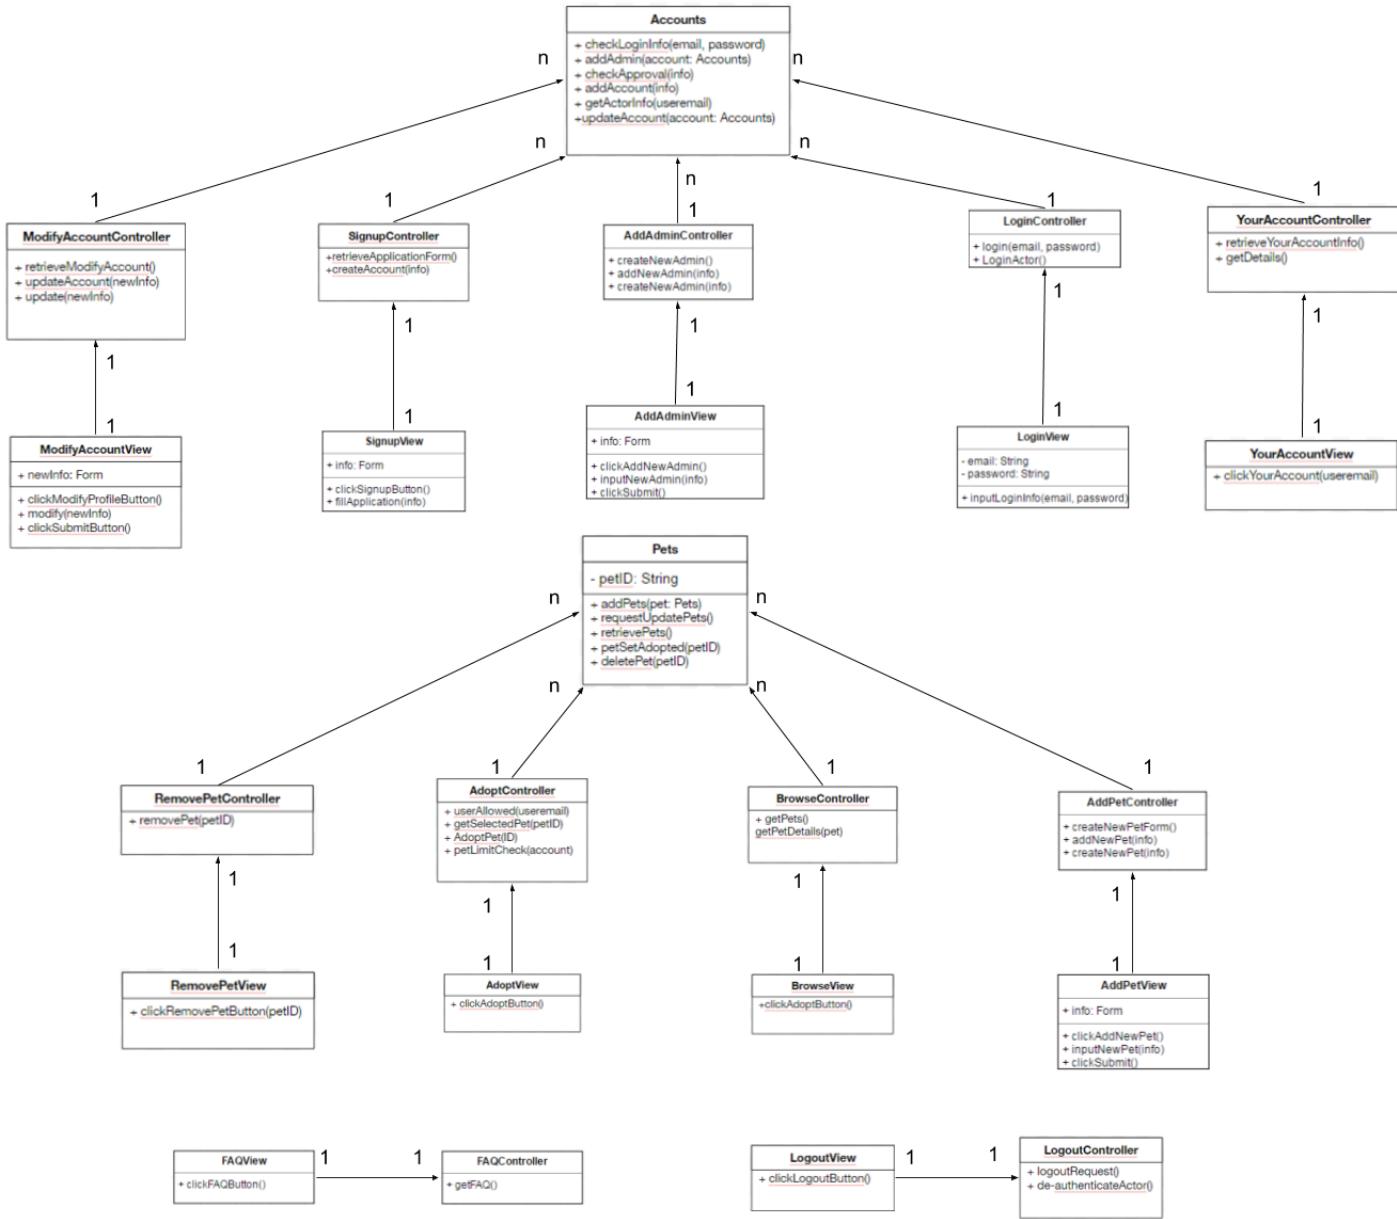

Quality Requirements:

- All added administrators will be available immediately.

3.5.4. User Interface

The screenshot shows the homepage of the "A Paw For You" website. At the top, there is a dark navigation bar with the site name "A Paw For You" on the left and links for "Home", "Adopt", "FAQ", "Sign Up", and "Login" on the right. Below the navigation bar, the main heading "A Paw For You Find Your Ideal Pet" is displayed. A large, blurry photograph of a brown tabby cat and a light-colored puppy is centered above the content area. Below the image, the section title "Adoption Fee Covers" is shown, followed by four square cards, each containing an icon and text about a specific service included in the adoption fee:

- Vaccination**: Pets will be vaccinated with all relevant vaccines. [Learn More](#)
- Parasite Free**: They will be free of any parasite such as fleas/ticks. [Learn More](#)
- Identification**: An identification tag for the pet; microchipping is recommended. [Learn More](#)
- Health**: Pets have undergone test(s) to ensure they are healthy. [Learn More](#)

3.5.4.1. Browse Pets

When a user initially views our *A Paw For You* page, they are shown the *Home* page. From here, the user can browse the pets available for adoption by clicking on the *Adopt* button.

FAQ For Cats

Home / FAQ For Cats

What type(s) of identify should my cat(s) have?

There are two options we recommend:
External Identification: outfit your cat with a collar and ID tag that includes your name, address and telephone number. No matter how careful you are, there's a chance your companion may become lost—an ID tag greatly increases the chance that your pet will be returned home safely. The cat's collar should not be tight; it should fit so two fingers can slip easily under his collar.

Microchip identification: Have your cat microchipped by your veterinarian. Microchip ID will ensure that your cat will be returned to you if he is lost, even if their collar came off. When scanned by a veterinarian or animal shelter, your phone number, address and other vital information will appear, and you can be contacted.

This is my first kitten/cat. What will I need to get?

Were any vaccinations given? What shots will be needed and at what age?

What tests should I have done to my cat?

When should my cat be spayed/neutered?

Can you recommend a veterinarian that participates in the State low-cost spay/neuter program? When is this offered and what will it cost?

What about declawing?

What should I feed my kitten/cat?

Will my cat use the litter box right away?

Is it okay for my kitten/cat to go outdoors?

How do I introduce my new kitten/cat to my other pet(s)?

Copyright © A Paw for You 2017

If the user clicked *Kittens/Cats*, the page above would be displayed.

The user can click on the question they wish to read and the answer to the question will be shown below it.

A Paw For You

Home Adopt FAQ ▾ Sign Up Login

FAQ For Dogs

Home / FAQ For Dogs

What type(s) of identification should my dog(s) have?

This is my first puppy/dog. What will I need to get?

When you're off your property should you keep your dog on a leash?

Should I spay or neuter my dog(s)? 

Dogs who have this routine surgery tend to live longer, be healthier and have fewer behavior problems (e.g., biting or running away). By spaying or neutering your dog, you are also doing your part to reduce the problem of pet overpopulation. If you feel you can't afford to have your pet spayed or neutered, we can help you find low-cost options.

Should I adopt a puppy or an adult dog?

When should my dog/puppy be spayed/neutered? Can the shelter recommend a veterinarian that participates in the State low-cost spay/neuter program?

How big will he/she get?

How old should a puppy be when it is first vaccinated?

What are the most common parasites that dogs get?

We want a second dog. Will he/she get along with the existing pet(s) in our house?

Will he/she be friendly and easy to introduce to my children?

How do I housebreak him/her?

Is it okay to keep my dog outside all day?

What should I feed my new dog/puppy?

In addition, the administrator can view more information on each individual pet. The only difference is that now the administrator has an *Adopt Pet* and *Remove Pet* button allowing them to adopt or remove the pet of their choice.

3.5.4.6. Remove Pet

The screenshot shows a web application for pet adoption. At the top, there's a navigation bar with links for Home, Adopt, FAQ, Your Account, and Logout. Below the navigation, the page title is "Adopt Pet Portfolio: Len". Underneath the title, a breadcrumb navigation shows "Home / Adopt / Pet Portfolio". The main content area features a large image of a black Labrador puppy named Len. To the right of the image, there's a "Pet Description" section with the text: "Len is a male labrador that was is very sweet and playful. He is definitely a very good boy." Below the description is a "Pet Details" section with a bulleted list: Dog, Male, Adult, Black, Large, and Labrador. At the bottom right of the content area are two buttons: "Adopt Pet" (blue) and "Remove Pet" (red). A small white dialog box with rounded corners is overlaid on the puppy image, containing the text "The pet has been successfully removed." with a "Close" button at the bottom right.

If the administrator wishes to remove a pet, the administrator needs to click on the Remove Pet button. Once this happens he/she will receive a confirmation window saying that the pet has been successfully removed.

As you can see in the image above, the dog named Len from the image above was removed from the Adopt page. The pet Len has been removed from the system.

3.5.4.7. Add New Pet

The screenshot shows a web page titled "Add New Pet Form". At the top, there's a navigation bar with links for "Home", "Adopt", "FAQ", "Your Account", and "Logout". Below the navigation, the page title "Add New Pet Form" is displayed. Underneath the title, a breadcrumb trail shows "Home / Your Account / Add New Pet". The main content area is titled "Pet Information" and contains seven input fields: "Pet Name", "Age", "Breed", "Color", "Sex", and "Size", each with a corresponding text input box. At the bottom of the form are three buttons: "Submit" (blue), "Reset" (orange), and "Cancel" (red).

The administrator must then fill out the entire form. All fields are required. If the administrator inputs invalid information or leaves a field blank, the administrator will receive a notification and the invalid fields are indicated by a mark. The system remains in the editing state.

The administrator is not able to submit the application until all fields are filled correctly.

The screenshot shows a web application for 'A Paw For You'. At the top, there's a navigation bar with links for Home, Adopt, FAQ, Your Account, and Logout. Below the navigation, the title 'Add New Pet Form' is displayed. A breadcrumb trail indicates the user is at Home > Your Account > Add New Pet. The main form area is titled 'Pet Information' and contains fields for Pet Name (Lexy), Age (2 months old), Breed (Golden Retriever), Color (Brown), Sex (Female), and Size (Large). A 'Submit' button is at the bottom left, and 'Reset' and 'Cancel' buttons are at the bottom right. A modal window is open in the center-right, displaying the message 'Pet added successfully!' with a 'Close' button.

Once the form has been completed and the administrator clicks the *Submit* button, he/she will receive a confirmation window saying that the pet has been successfully added.

The pet will be added to the system and will be available immediately on the *Adopt* page.

3.5.4.8. View User Profile

The screenshot shows a user profile page titled "Account Information". At the top, there is a navigation bar with links for "Home", "Adopt", "FAQ", "Your Account", and "Logout". Below the navigation bar, the page title "Account Information" is displayed. A breadcrumb navigation shows "Home / Your Account". The main content area is titled "Your Account" and contains three sections of form data:

Contact Information:	
First Name:	Sample
Last Name:	Client
Address:	1234 SW 123th Street
Phone Number:	(123) 456-7890
Occupation:	Sample occupation
Email	sample@gmail.com

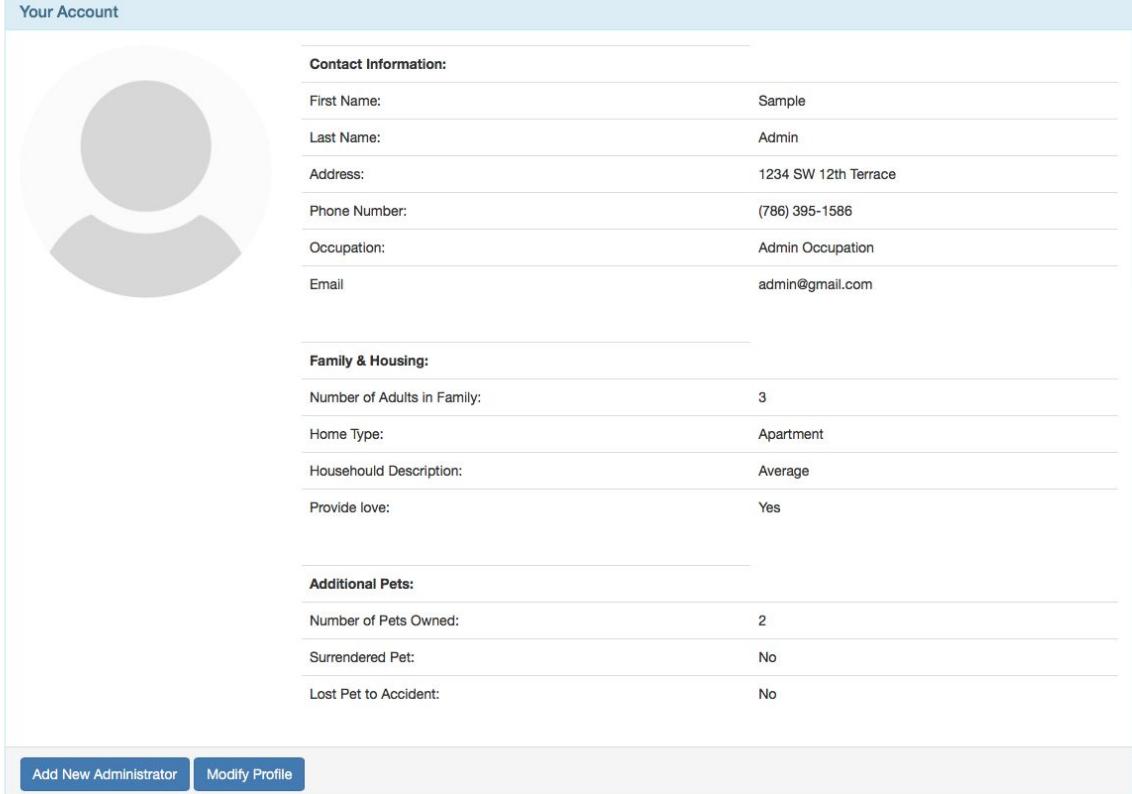

Family & Housing:	
Number of Adults in Family:	2
Home Type:	Apartment
Household Description:	Noise
Provide love:	Yes

Additional Pets:	
Number of Pets Owned:	2
Surrendered Pet:	No
Lost Pet to Accident:	No

At the bottom left of the form area, there is a blue button labeled "Modify Profile".

If the client clicks on the *Your Account* button on the navigation bar, the view user profile will show the information they input when they filled out their application.

If anything changes, the user can change the information on the account by clicking on the *Modify Profile* button.

The screenshot shows the 'Your Account' page from a website. At the top, there's a navigation bar with links for Home, Adopt, FAQ, Your Account (which is highlighted in blue), and Logout. Below the navigation bar, the title 'Account Information' is displayed. Underneath the title, a breadcrumb trail shows 'Home / Your Account'. The main content area is titled 'Your Account' and contains three sections: 'Contact Information', 'Family & Housing', and 'Additional Pets'. Each section has a table-like structure with key-value pairs.

Contact Information:	
First Name:	Sample
Last Name:	Admin
Address:	1234 SW 12th Terrace
Phone Number:	(786) 395-1586
Occupation:	Admin Occupation
Email	admin@gmail.com

Family & Housing:	
Number of Adults in Family:	3
Home Type:	Apartment
Household Description:	Average
Provide love:	Yes

Additional Pets:	
Number of Pets Owned:	2
Surrendered Pet:	No
Lost Pet to Accident:	No

Add New Administrator **Modify Profile**

If the administrator clicks on the *Your Account* button on the navigation bar, the view user profile will show the information they input when they filled out their application.

If anything changes, the administrator can change the information on the account by clicking on the *Modify Profile* button.

If the administrator wishes to add a new administrator to the system, the administrator can do so by clicking on the *Add New Administrator* button.

3.5.4.9. Modify Profile

The screenshot shows a user profile modification interface. At the top, a dark header bar contains the site name "A Paw For You" and navigation links: Home, Adopt, FAQ, Your Account, and Logout. Below the header, the main content area has a light gray background. A title "Modify Profile" is centered at the top of this area. Underneath, a breadcrumb trail shows the current location: Home / Your Account / Modify Profile. The main form is titled "Contact Information". It includes fields for First Name (Sample), Last Name (Admin), Occupation (Admin Occupation), Address (1234 SW 12th Terrace), Phone Number ((786) 395-1586), Email (admin@gmail.com), and two password fields (one labeled "Please enter a password" containing "admin" and another labeled "Please re-enter the password" also containing "admin"). Below the contact information, a section titled "Family & Housing" asks "How many adults are there in your family?" with a dropdown menu showing the number "3".

3.5.4.11. Logout

The screenshot shows the 'A Paw For You' website. The top navigation bar includes links for Home, Adopt, FAQ, Your Account, and Logout. Below the navigation is the tagline 'A Paw For You Find Your Ideal Pet'. A large, close-up photograph of two kittens (one calico, one orange) serves as the main visual. Below this is a section titled 'Adoption Fee Covers' featuring four categories: 'Vaccination' (green icon of a briefcase with a cross), 'Parasite Free' (red circle with a crossed-out parasite), 'Identification' (green paw print icon), and 'Health' (green heart with a pulse icon). Each category has a brief description and a 'Learn More' button.

Vaccination	Parasite Free	Identification	Health
Pets will be vaccinated with all relevant vaccines.	They will be free of any parasite such as fleas/ticks.	An identification tag for the pet; microchipping is recommended.	Pets have undergone test(s) to ensure they are healthy.
Learn More	Learn More	Learn More	Learn More

If the user wishes to logout at any point, they can click on the *Logout* button in the navigation bar and the user will be redirected to the *Home* page no longer logged in. As shown in the image in the following page.
